

AI & Technology Intern

About Us

We are building a modern technology platform focused on AI tools, programming tutorials, developer projects, and technical learning resources. Our mission is to create high-quality, beginner-friendly, and developer-focused products and content around AI and software development.

Role Overview

We are looking for passionate and motivated interns interested in AI, software development, and digital product building. As an AI & Technology Intern, you will work on real-world projects across development, testing, technical content, research, and design based on your interests and strengths.

Key Responsibilities

- Develop and improve website features and AI-related tools
- Assist with frontend/backend development and product enhancements
- Perform testing, identify bugs, and suggest improvements
- Write beginner-friendly technical tutorials and learning resources
- Research emerging technologies in AI, LLMs, RAG, LangChain, and automation
- Contribute to UI/UX improvements and overall platform usability

Required Skills

- Basic knowledge of programming languages such as Python, JavaScript, or Java
- Interest in AI, software development, and modern technologies
- Strong problem-solving and learning mindset
- Good communication and collaboration skills
- Ability to work independently in a remote environment
- Must have a personal laptop and a stable internet connection

Preferred Skills

- Familiarity with AI concepts, LLMs, RAG, LangChain, or automation tools
- Experience with technical writing, blogging, or documentation

- Knowledge of GitHub, APIs, or web technologies
- Understanding of UI/UX or software testing concepts

Internship Details

- Fully Remote Internship
- Flexible working hours
- Duration: 3–6 months
- Internship certificate provided
- Hands-on experience with real-world AI projects
- Opportunity to work on impactful technology products

Stipend

- Stipend: ₹10,000/month
- Stipend will be provided after evaluating performance during the first month
- Continued stipend eligibility will depend on overall contribution and performance

Ideal Candidates

- B.Tech, BCA, MCA, or M.Tech students
- Freshers passionate about AI and technology
- Self-learners and tech enthusiasts seeking practical industry experience

How to Apply

Send your resume along with:

- Skills and areas of interest
- GitHub, Portfolio, or LinkedIn profile (if available)
- Previous projects, technical blogs, or writing samples (if any)
